

Fleet Industry Issues Effectively Solved by Skyzone Trace System

- The intricacies and complexities of administration
- The tremendous financial burden in effectively controlling drivers and vehicles
- The uncertainty about field activities which arises from lack of information
- Improper vehicle utilization and driver/field staff productivity
- The abuse of vehicle by company drivers/field staff
- The use of unscheduled routes and making unscheduled deliveries
- Curbing the costs of insurance, fuel and vehicle maintenance through monitoring and control of driving activities like speeding.
- Productive vehicles and drivers directly lead to an enhancement in sales potential
- The ability of a rapid and effective response which provides increased efficiency
- Inefficiency in dispatching and general production time management
- use of excessive fuel due to poor rout planning, Rampant Fuel thefts, unmanaged vehicle Idling , False Re-filling volumes, e.t.c
- High maintenance costs due to bad driving, over speeding, unauthorized vehicle/asset usage
- Missed deliveries and Pick-ups due to unmanaged delays, unauthorized route diversions
- Inaccuracy in the determination of payroll hours
- General costly lies by field staff , Asset operators or resource managers
- Unsafe and risk prone driving habits
- Difficulty in timely renewals and management of Asset insurance premiums and maintenance schedules
- Lack of precision in mileage or Engine Hours and fuel records
- Difficult verification of accurate fuel deliveries and dispensing at Fuel service stations and Depots
- No other quick sure way of locating and recovering asset/Vehicle in case of theft
- Difficulty in assigning responsibility to the Asset user in case of any violations.
- Difficulty in easy and accurate location of your field staff and ascertaining ongoing field activity.
- overall production time wastage and Asset mismanagement .
- Un professional or Ethically sound drivers/operators and some fleet managers
- The risk of delaying or losing your Cargo due to general difficulty in following up events around your Cargo
- The risk of all your perishable goods getting damaged by high temperatures due to unconsciousness or unresponsiveness of the driver/asset operator
- Risk of Marine Vessels getting lost from right route and delaying the journey or Knocking underwater obstacles with the high risk to Sink
- Difficulty in locating Accident Victims in case of Marine Vessel sinking or getting any fatal accident
- General difficulty in Locating and efficient management of scattered/Terrain plants or Installations/Investments
- General difficulty in Navigating the route to the destination in case of new unexplored journeys/places
- Difficult management and verification of on route terrorism, Accident or disaster activity.
- Difficulty locating for Tourists or tracking lost Game Wild life by Game park managers/rangers hence leading to lost revenue
- Difficulty locating some lost or scattered animals in a big farm
- Difficulty locating lost domestic animals and pets.
- It allows efficient management of the company and provides enhanced tracking of the drivers and the vehicles which are the most essential assets of any organization
- The regular inflow of information of service deliveries and service stops provides an augmentation in customer satisfaction
- And many others

Concerns Over Employee Efficiency

- *What are your drivers or field personnel doing during working hours?*
- *Are they adhering to the preplanned routes?*
- *Are the goods and services being delivered to customers on time?*
- *How much time is spent by drivers with the customers?*
- *Where did they stop and for what duration?*
- *Are they entering unauthorized zones during the period of work?*
- *Are they subjecting the company vehicles to misuse?*
- *How much fuel and time is wasted due to idling or unauthorized Asset usage?*
- *Is time and fuel being unduly wasted as they search for the right route?*
- *Can the labour , Vehicle maintenance/usage and fuel cost be calculated more precisely?*

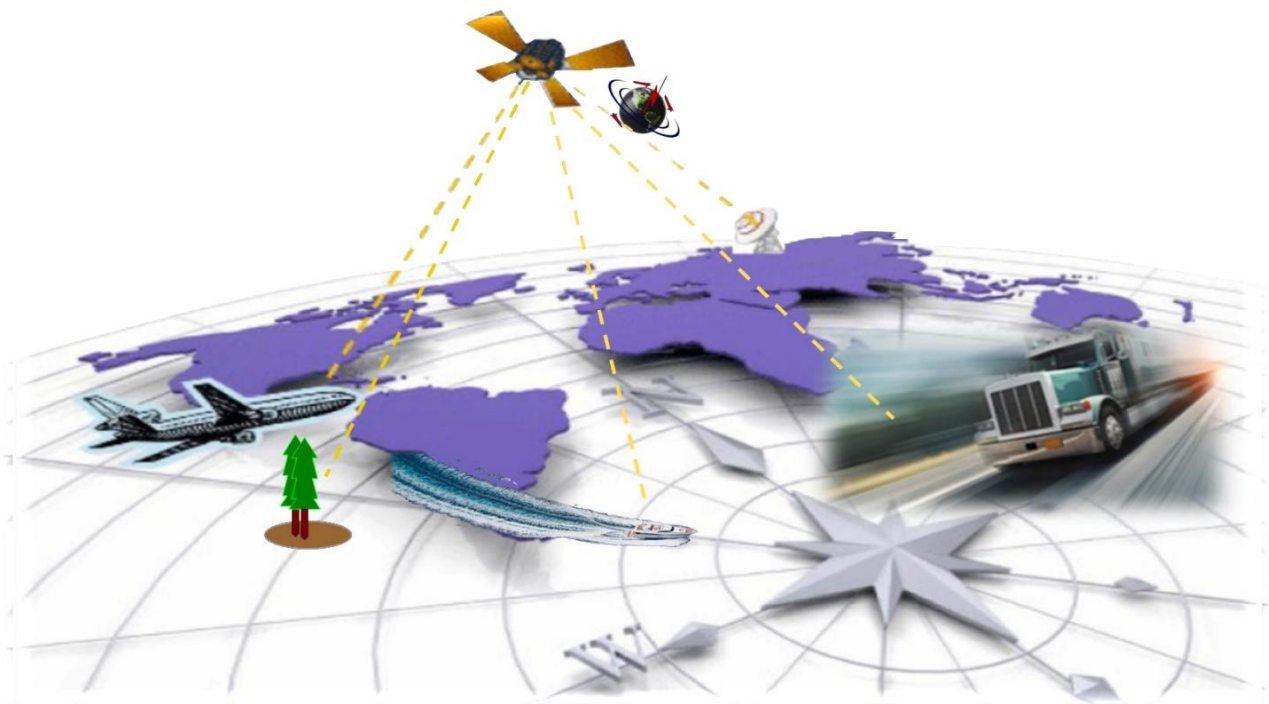

Major Areas of Expertise in our advanced GPS Fuel Management.

- Fuel Transportation Tankers
- Cargo Trucks, Business/ industrial vehicles ,Buses, Road & Rail Trains,
- Generators, Industrial Machinery and all Terrain Plants
- Construction Machinery and heavy duty plants/Trucks
- Taxis & all types and models of Vehicles--business or personal.
- Boats, Ferries, Ships, e.t.c.
- Telecom site Fuel General Management--Deliveries & GPS monitoring
- Fuel stations & Depot Fuel Integrated system management
- Fuel for all types, sizes and Locations of Storage Tanks --(Overhead or Underground)
- General Management and monitoring of Fuel related Human and Environmental hazards and Disasters
- Management of Oil/Fuel generation Plants and pipelines

SEE HOW OUR GPS FLEET/FUEL/ ASSETS & ALL REMOTE RESOURCES MANAGEMENT SOLUTION CAN HELP YOU MAXIMISE YOUR PROFITS AND STABILIZE YOUR GROWTH & SAFETY

Giving you the Best Filtered, Detailed and Customized Fuel Reports Most Useful For Quick and Accurate Decision Making.

- **Time zone and Range or interval of your own choice**
- **Fuel in Tank Before Re-filling**
- **Fuel Volume Added**
- **Total Fuel after Re-Filling**
- **Fuel before Theft/dispensing activity**
- **Total Volume of Fuel Stolen/dispensed**
- **Fuel after theft/dispensing activity**
- **Location of Fuel theft/ Re-filling/dispensing event**
- **Driver/Asset operator name, photo & Bio-details**
- **Time of Theft/dispensing or Tank re-filling**
- **Number of thefts/Re-filling events & locations**
- **Location with live and detailed satellite Map**
- **Asset Parking/Stop time and duration**
- **E-mail and SMS Fuel theft and Re-filling Alerts**
- **Fuel leakage Alarms**
- **Engine actual Fuel and Engine oil consumption monitoring & Reports**
- **Accurate Mileage for mobile Assets and Engine Hours for the case of Stationary Machinery**
- **CCTV integrated live Video Fuel activity Surveillance (Video & Voice monitoring)**
- **History live play back up to more than two years**

OUR COMPLETE FLEET MANAGEMENT PACKAGE

- GPS Vehicle real time location & dispatch
- Global Vehicle tracking services (Cross-country Vehicle roaming and Remote Theft Management)
- Fuel Theft and Fraud monitoring and management
- Over speeding , Bad Driving and Geo-Fence/No-Go-Zone restriction Mg't
- Vehicle Theft and Fraud Detection, Timely immobilization & Mg't
- Automatic Driver/ Field staff Identification and management
- Automatic Insurance and service time management
- Automatic Asset hire reminders and management
- Cargo tracking and management
- Remote Temperature real time monitoring & management for vehicles transporting Perishable goods
- Fleet Crew & Cargo CCTV live video surveillance via GPS Trace system
- Driver recruitment, Ethical Training or supply for Org'ns
- Inventory Management Training and Policy development.
- Public Transport Management
- Asset Access and Usage Policy Development & Staff compliance Training
- Transport Business Proposal Development, Performance Analysis and System Dev't.
- Marine & Aviation Fleet, Fuel and crew management
- Advanced GPS/GSM integrated Fleet Security Alarm systems.
- Weight/Vehicle Load Real time Tracking
- Heavy Trucks and Machinery Tire Pressure real time monitoring
- Engine Oil Real time consumption Monitoring

Advanced Theft & Fraud Management for Motorcycles, Vehicles and Small Automobiles

- *Motorcycles, Boats, Small vehicles, equipments and Machinery GPS integrated Theft , Fraud & Misuse Mg't*
- Helping Gov't Authorities, Cycles/Car Dealers, City/Traffic authorities, Loan officers, Businesses, Organizations, Institutions & individuals eliminate loop holes that accelerate Fraud, Asset loses, Misuse or Traffic disorder.
- Total Theft Control, Hire and Field operations management for NGO, Business and Institutional Motorcycles
- Urban Motorcycles street Parking and Traffic management.
- Fishing Boats GPS integrated management
